

The Dallas Group of America

Empowering Growth & Expansion with SAP All-In-One

QUICK FACTS

The Dallas Group of America

- Location: Whitehouse, NJ
- Industry: Chemical
- Products: Synthetic magnesium silicate
- Employees: 100+
- Web Site: www.dallasgrp.com
- Solutions: SAP Business All-in-One
- Partner: Answerthink, Emtec

Dallas Group is the world's premier producer of adsorbent synthetic magnesium silicate, marketed under the name Magnesol®XL and DALSORB®.

Dallas is also the only U.S.-based manufacturer of ammonium chloride, which is sold and marketed worldwide. They also manufacture lignin, which is becoming increasingly important in many industrial applications.

Key Challenges

- Multiple locations, small team with limited time
- Integrating processes across locations, departments

Objectives

- Replace multiple home grown and proprietary systems with a single-solution IT landscape
- Implement a scalable solution to support growth
- Gain critical analysis and reporting functions
- Support existing process with best practices
- Simplification of business processes

Implementation Highlights

- Strong Project Sponsorship
- Managed Scope Extremely Well
- All sites live at same time

Why SAP

- The best integrated solution that can be used anytime and anywhere, across our global enterprise
- Preconfigured solution driven by ASAP, SAP's powerful implementation methodology

Benefits

- One version of the truth
- Real-Time visibility
- Streamlined processes
