Gallus Biopharmaceuticals is a premier biologics contract manufacturing company based in St. Louis, MO. Gallus operates an FDA-approved, commercially-certified facility formerly owned by Johnson & Johnson. The Gallus facility has capabilities for mammalian cell culture and protein purification in both perfusion and fed batch mode and is being expanded to offer additional development and clinical services capabilities. The plant currently produces two leading commercial biologics products, distributed globally.

# Gallus BioPharma On-time & On-Budget Implementation

## Key Challenges

- Build a team in a short period of time (many functions were being supported by corporate)
- Lack of integration in current legacy systems
- Many processes were manual, excel-based and completed outside the system

## Objectives

- Implementing a fully FDA Validate standalone system in 3 months
- Implementing a cost-effective systems infrastructure to support anticipate growth
- Strong support for regulatory compliance & quality management systems
- Implementing an integrated system that will support operational excellence

## Implementation Highlights

- Project scope included SAP Finance & Accounting, Sales & Distribution, Inventory Management, Production, Quality Management and Plant Maintenance
- Rapid 14-week implementation
- Able to meet aggressive timelines in moving off corporate systems from former parent

## Why SAP

- The best integrated solution that can be used anytime and anywhere, across our growing enterprise
- Preconfigured solution built on SAP Best Business Practices for Life Science Industry
- Answerthink client references in the Life Science and Pharmaceutical Industry

## Benefits

- Implementation completed On-Time, On-Budget
- Fully integrated system with improved business process flows
- System support for operational excellence and continued improvement
